NEWS RELEASE

NEW FITTING CONNECTS WARDFLEX® IN LESS TIME, EVERY TIME.

BLOSSBURG, Pa. – Ward Manufacturing, manufacturer of WARDFLEX CSST (Corrugated Stainless Steel Tubing), has introduced the StepSaver Double-Seal Fitting. The new fitting is designed to reduce assembly time, with a metal-to-metal and metal-to-gasket double-seal to minimize the potential for leaks.

The StepSaver fitting is streamlined in size, yet packed with user-friendly efficiencies and double-seal safety. The compact design is 40% smaller than it's predecessor, and quickly fits into smaller spaces. The double-seal improves dependability and reduces opportunities for leak potential. And the reusable gasket allows for fast reassembly without replacing any of the fitting components.

WARDFLEX is a continuous, flexible, annular stainless-steel gas piping system that delivers more performance and installation advantages when compared to either black-steel pipe or other ordinary corrugated stainless-steel tubing (CSST) systems. Certified by the Canadian Standards Association, WARDFLEX can be used wherever gas service is needed. For new construction, rehabilitation or remodeling, WARDFLEX stainless-steel gas piping is the answer to more installed feet, and profit, per day.

WARDFLEX installs without time consuming (and costly) heavy lifting, cutting, threading, extensive measuring and mess of conventional steel piping. The one corrugate-ring crush zone seals tight with a couple of quick turns with simple hand tools in a few minutes. And the

- more -

continuous lengths and amazing flexibility of WARDFLEX greatly reduce the number of needed connections (and chances for leaks) in any installation. WARDFLEX is more flexible than other CSST systems because it is fully annealed during manufacturing. And more flexibility adds up to fewer connections, even in the most difficult installations.

Visit the WARDFLEX website (www.wardflex.com) for more information or to download a new brochure. The website provides extensive information for contractors and engineers, including how-to assembly information, design & installation requirements, dimensions and drawing, where to buy, literature downloads, frequently-asked questions, important contacts, etc. Or call WARDFLEX toll-free at 800-248-1027.
