

WARDFLEX INFORMATION CARD

STOP! READ! FUEL GAS CAN BE DANGEROUS!

TO WARDFLEX CONSUMER:

Thank you for using our WARDFLEX product. We are proud of our quality products. Please read this WARDFLEX Information Card before using your WARDFLEX system.

- A gas delivery system consisting of CSST offers certain advantages over other gas delivery systems because of its wall thickness and corrugated design. While CSST provides advantages over more rigid gas delivery systems like steel pipe, CSST's wall thickness may make it more likely than rigid steel pipe to be punctured by a nail or other sharp object, or by other extraordinary forces such as a lightning strike. It is well known that lightning is a highly destructive force. Your WARDFLEX system must be properly bonded and grounded. In order to maximize protection of your entire structure from lightning damage, you should consider installation of a lightning protection system per NFPA 780 or local codes, particularly in areas prone to lightning.
- Do not allow acids, bases, salts, or other caustic materials to come in contact with your WARDFLEX system. Some compounds that have been identified as corrosive to 304 stainless steel include muriatic acid, brickwash, soldering flux, pool algicide, bleach or pool chemicals, fungicides or wood preservatives, swimming pool flocculent, scale removers, salt water, battery acid, and dishwashing soap. Any contact by these materials with your WARDFLEX system should be immediately and thoroughly washed off.
- If you smell gas, do not touch any electrical switch; do not use any phone in your structure. Immediately call your gas supplier from a neighbor's phone. Follow the gas supplier's instructions. If you cannot reach your gas supplier, call the fire department.
- Installation and service must be performed by an installer trained and certified by Ward Manufacturing, Inc.
- For more information, please call your installer or visit www.wardflex.com.

TO WARDFLEX INSTALLER:

WARDFLEX Design & Installation Guide, please be sure to do the following:

- Tie a copy of this card to a fitting for the WARDFLEX system that will be visible to the homeowner after installation.
- Leave a copy of this card with the builder in the case of installation of WARDFLEX as part of a new home construction, or with the homeowner in the case of installation or repair of WARDFLEX as part of an existing home.
- Inform the electrician that WARDFLEX must be properly bonded and grounded in accordance with the WARDFLEX Design & Installation Guide and relevant codes.
